

Downloading the Application

Apple iPhone

1. Go to **App Store**.
2. Search **DIGIPASS for Business Banking**.
3. Click **Install**.

Android

1. Go to **Play Store**.
2. Search **DIGIPASS for Business Banking**.
3. Click **Install**.

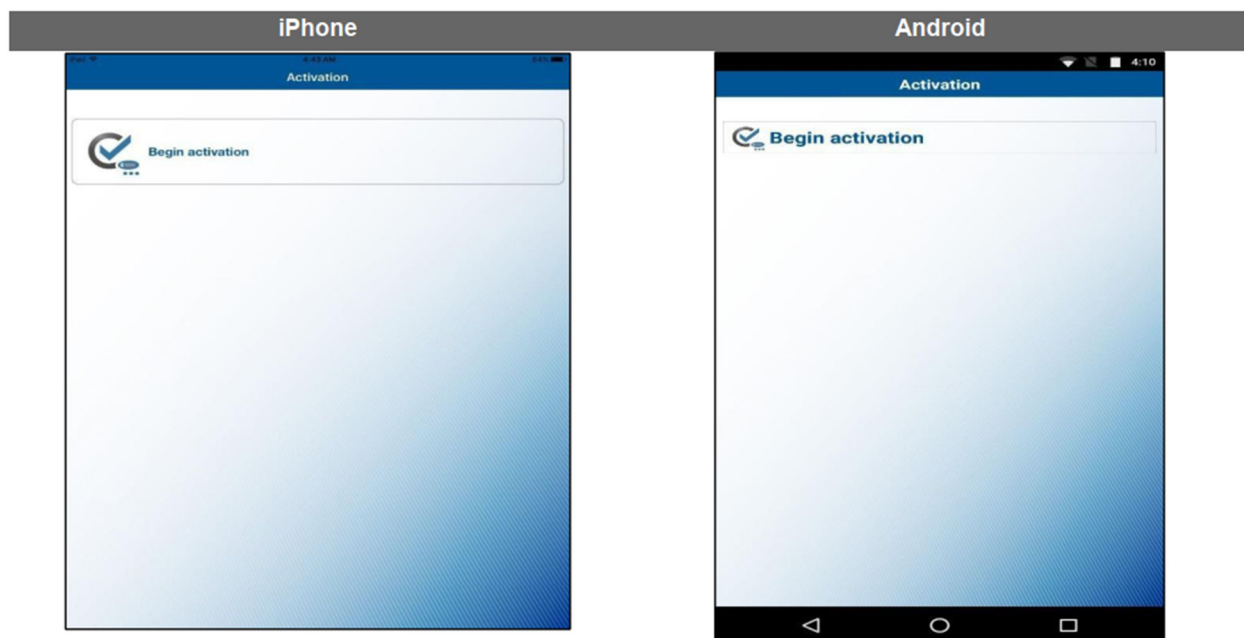

Important: For a successful soft token activation, download DIGIPASS for Business Banking application on a separate mobile device than the device on which you have already signed in to Business Online. Business Online requires you to download the application on a separate mobile device so that you can scan the image that displays in Business Online and complete the sign in and transaction process.

Activating the Soft Token

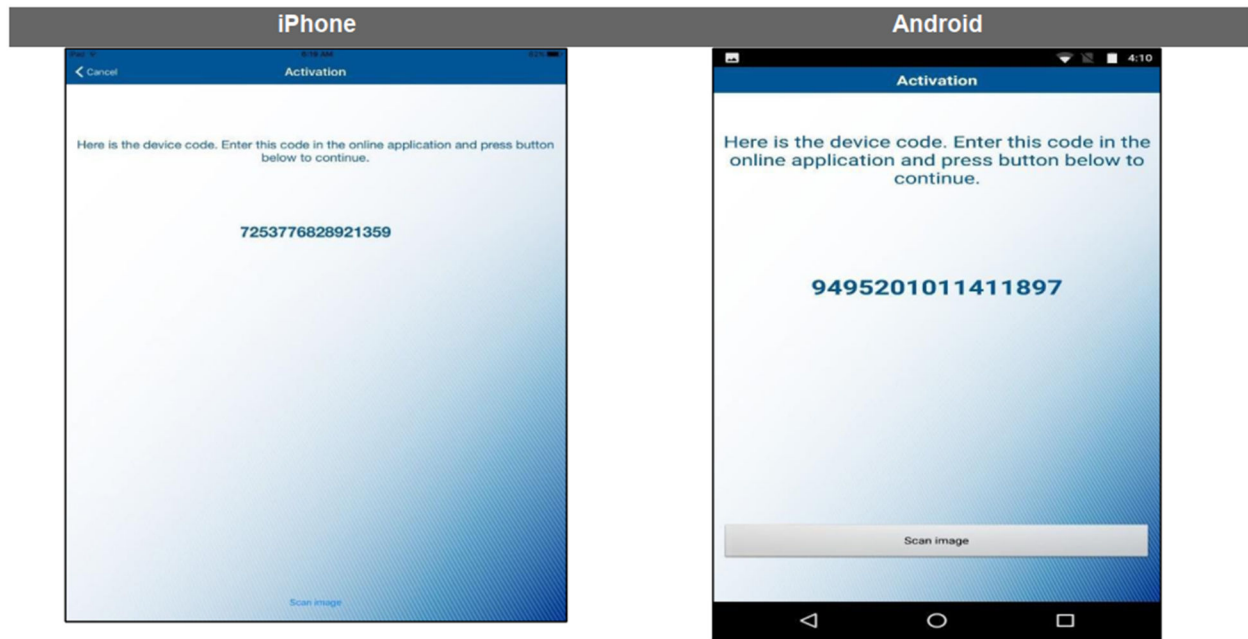

After you download the application on your device, you need to activate the soft token. Complete the following steps to activate the soft token on your mobile device.

Important: For a successful soft token activation, download DIGIPASS for Business Banking application on a separate mobile device than the device on which you have already signed in to Business Online. Business Online requires you to download the application on a separate mobile device so that you can scan the image that displays in Business Online and complete the sign in and transaction process.

1. Click **Begin activation**.

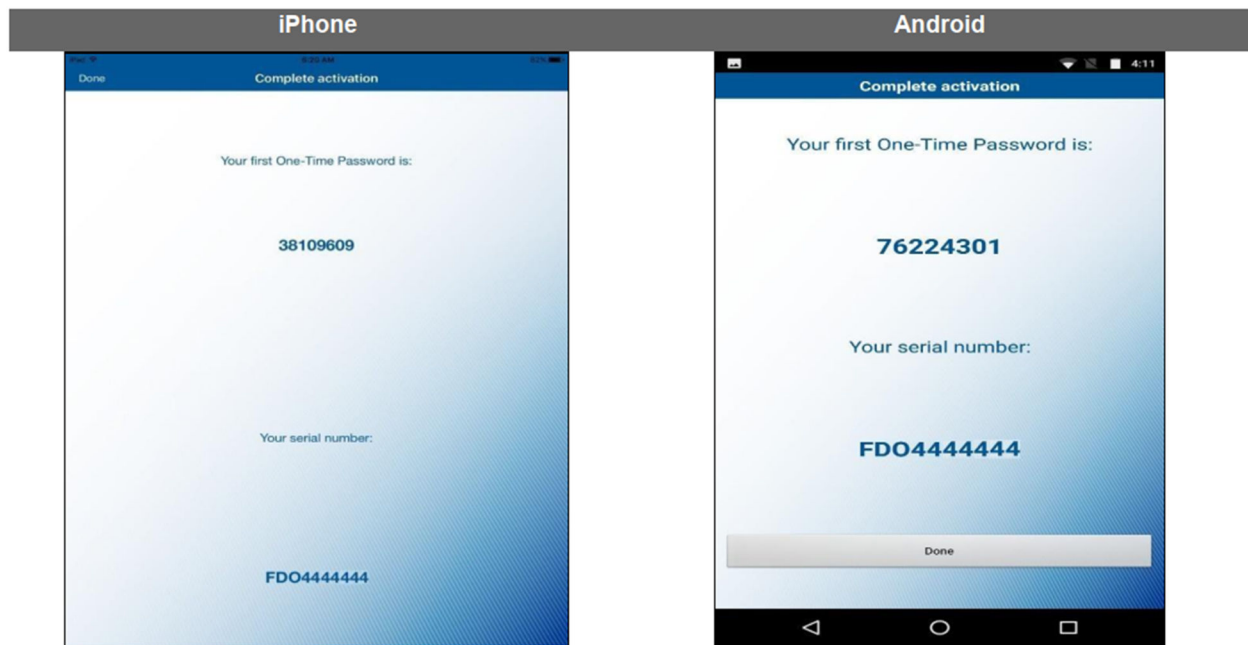

2. Click **Scan image** to scan the first image that displays on your Business Online application. A device code appears on your device.

3. Enter the **device code** on your Business Online application.

4. Click **Scan image** to scan the second image that displays on your Business Online application. The Complete activation screen appears.

Note: If your device has a fingerprint protection feature, a dialog box to activate your biometric protection appears after you scan the second image. Click **Yes** if you want to activate fingerprint protection for the application, otherwise, click **No**.

5. Enter the first **One-Time Password** in the Business Online application. The Complete activation screen displays the soft token serial number assigned to you.

6. Click **Done**

Using the Features and Functionality

The application offers you the following features and functions:

One-Time Password

Digital Signature

Add Another Token

Remove a Token

One-Time Password

Use the **One-Time Password** feature for logging and performing transactions on the Business Online application.

Note: If the Change password or Manage fingerprint protection feature is enabled in the Settings menu of your application, you need to provide the local password or fingerprint before the device generates a one-time password.

Digital Signature

Use the **Digital Signature** feature to scan the image that displays on your Business Online application to generate a password at the time you perform a transaction.

Add Another Token

If you are associated with different companies, use the **Add another token** feature to add another soft token on your device.

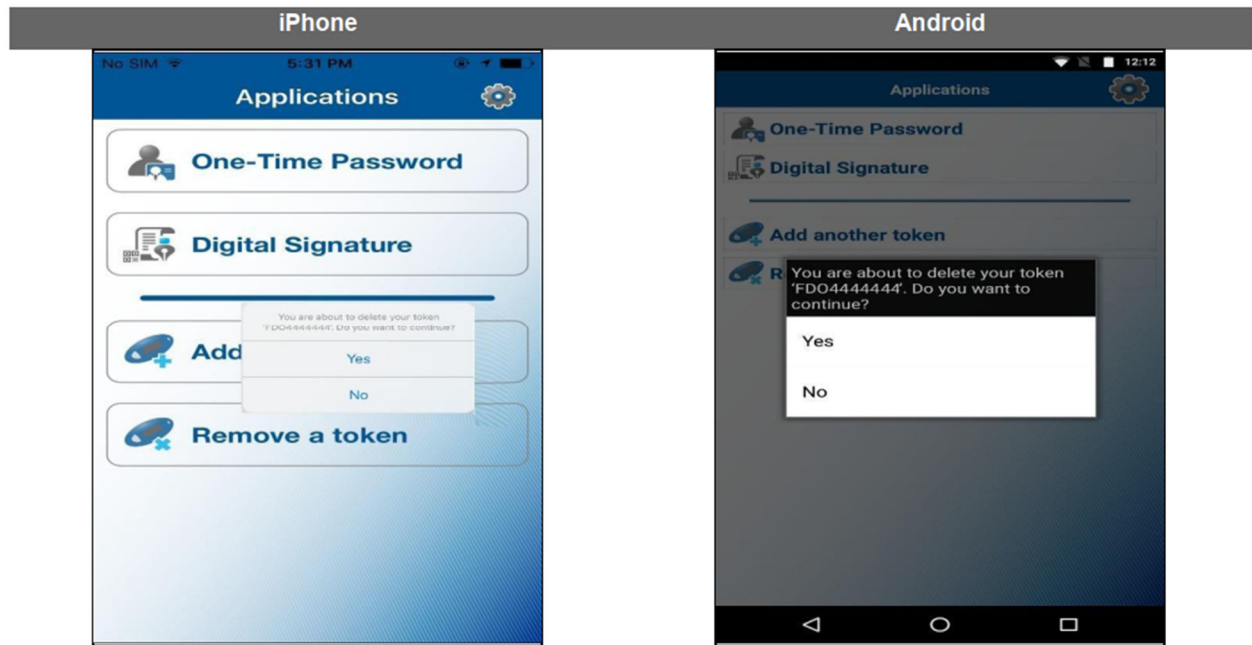

Follow steps 2 through 6 of Activating the Soft Tokens section to add multiple soft tokens.

Note: If a soft token serial number already exists, the device prompts for confirmation of whether you want to overwrite the existing soft token.

Remove a Token

Use the **Remove a token** feature to remove a token from the application. Complete the following steps to remove a token.

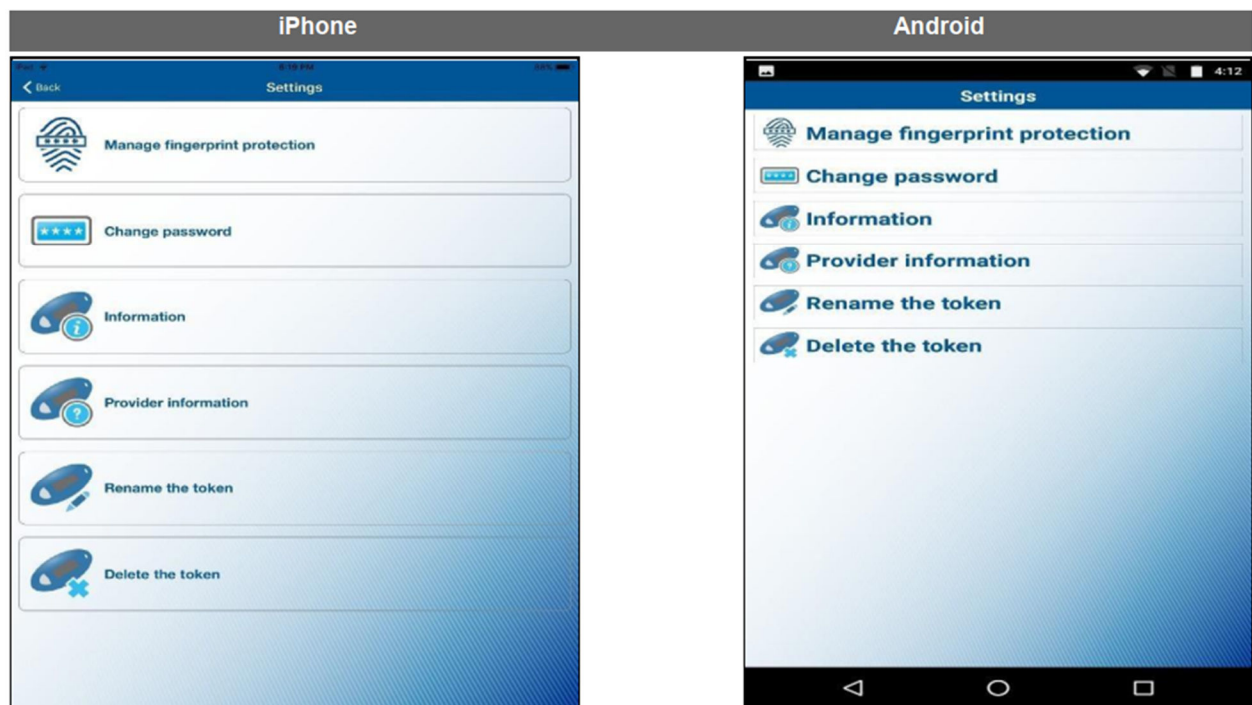

1. Scan the image that displays on your Business Online application to remove the soft token. A confirmation message to remove the token appears.
2. Click **Yes**.

Working with Settings

The **Settings** button displays on the top bar of the application. The following options are available:

- [Manage Fingerprint Protection](#)
- [Change Password](#)
- [Information](#)
- [Provider Information](#)
- [Rename the Token](#)
- [Delete the Token](#)

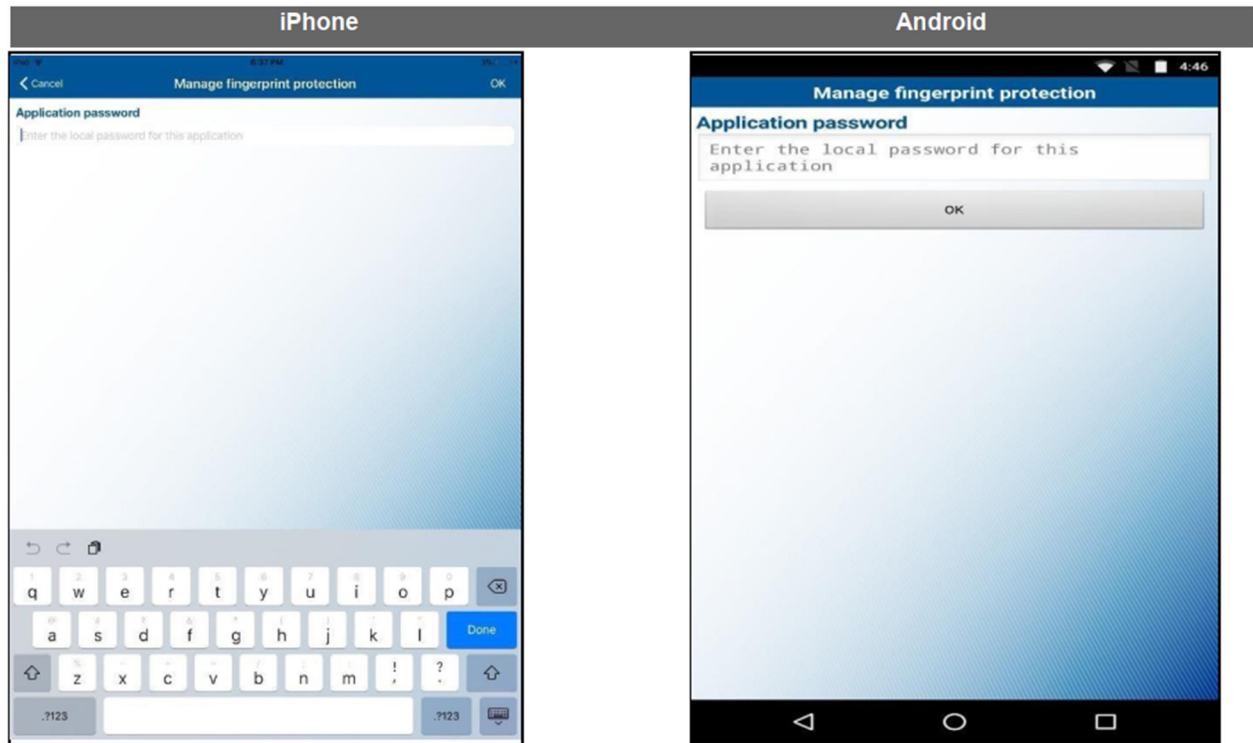

Manage Fingerprint Protection

The **Manage fingerprint protection** option allows you to enable or disable biometric protection for the application. The option provides you with an extra level of security at the time of activation of the soft token, logon, or performing transactions.

Note: This option only displays on a device that supports the biometric protection feature and the feature is enabled.

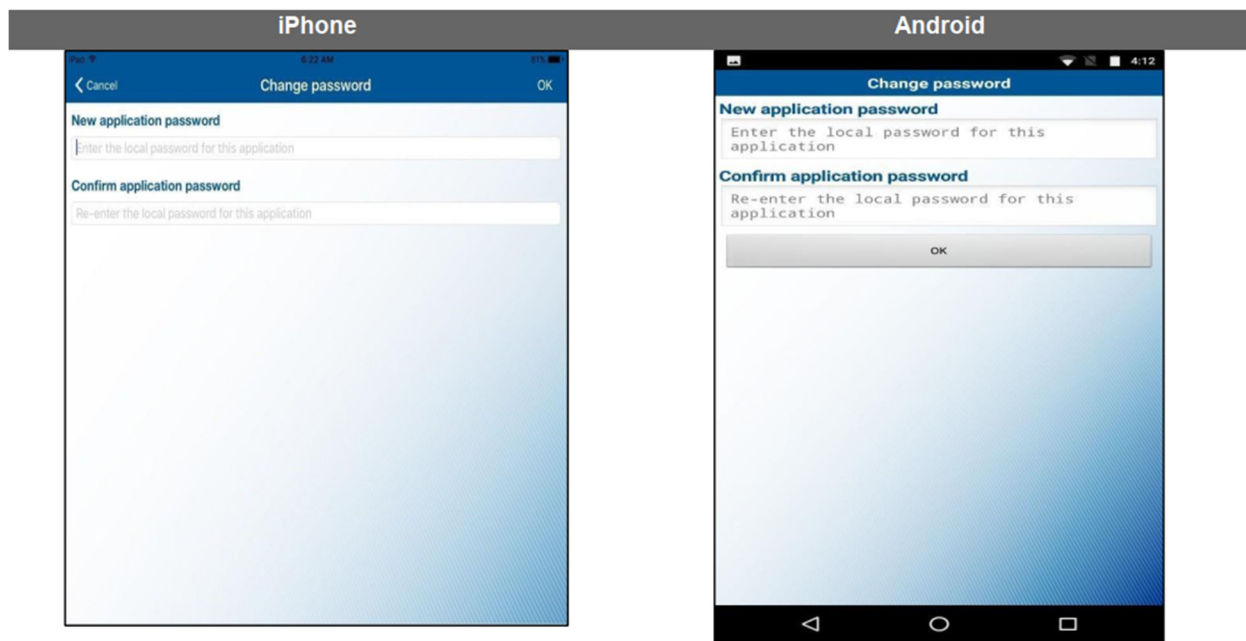

You need to provide the local password to activate the **Manage fingerprint protection** option.

Change Password

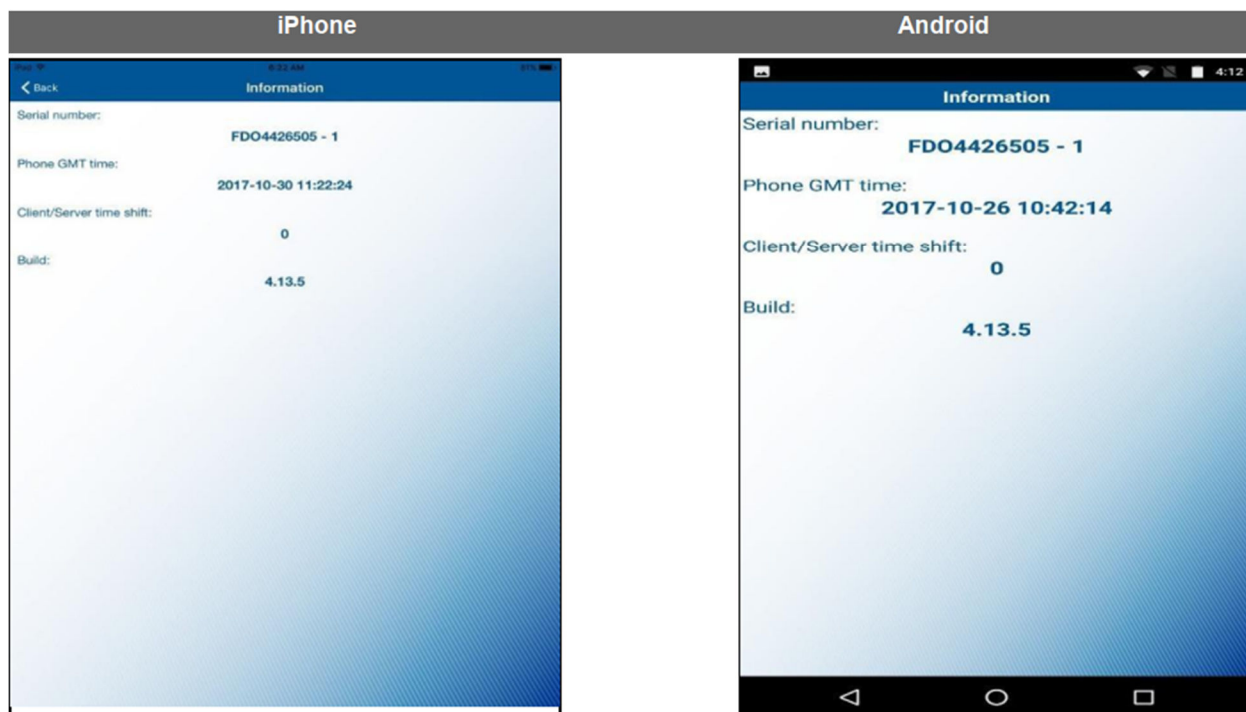

The **Change password** option allows you to add or change the local password.

Note: This option does not display if the **Manage fingerprint protection** option is enabled.

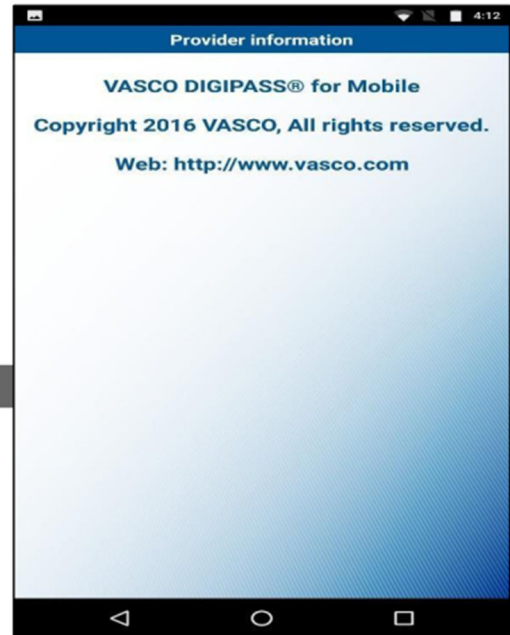

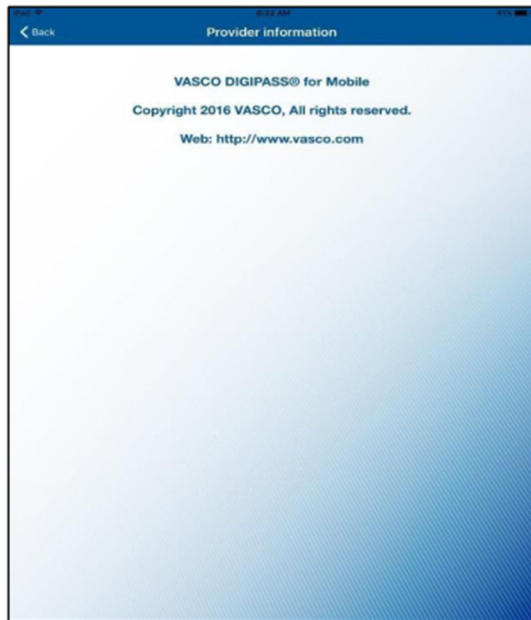

Information

The **Information** option displays the soft token serial numbers and other application details.

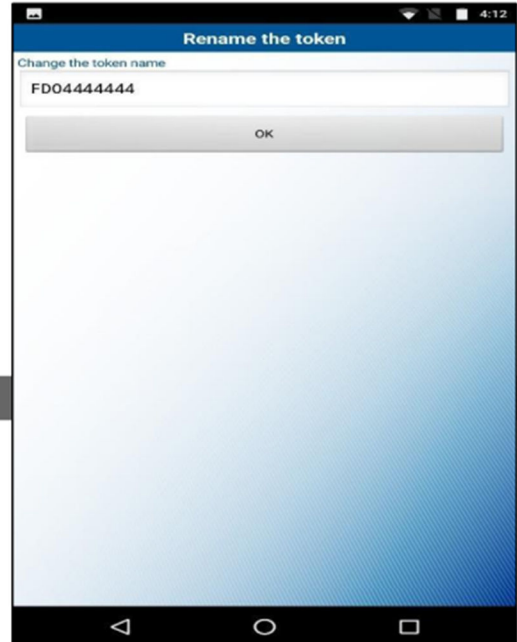

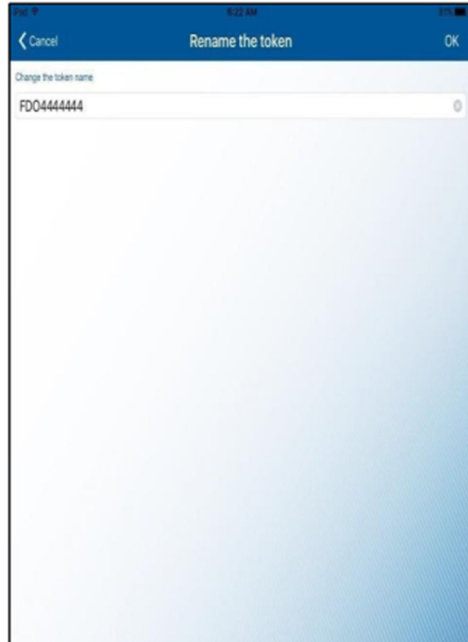

Provider Information

The **Provider information** option displays copyright information of the provider.

Rename the Token

The **Rename the token** option allows you to rename the available tokens.

Delete the Token

The **Delete the token** allows you to delete the soft tokens without scanning the image.
